		12
1.	N/A	Sat, Jul 10, 2010 12:11 PM Find...
2.	The principal is the instructional leader of a school and as such is responsible for the success of all students. Excellent principals share a set of skills that can be learned. The best way to learn those skills is through a combination of academically challenging courses and by practicing those skills with an accomplished principal. Finally, and perhaps most importantly, while there are many paths to a desired result, a principal's careful navigation of the path to improved student achievement must be guided by a clear mission and vision. 2.	While I becoming a principal has been and remains my goal, the learning I have gained in ELDA is applicable to how I lead my classroom, my grade level, and my own life. In addition to the knowledge that I have gained to practice the principalship, I have also learned more about just how good one has to be in order to be an effective site leader. That said, I may need a year as a VP under an exemplary principal to develop my operational skills before I am fully equipped to serve in a very high needs school.	Sun, Jul 4, 2010 3:01 PM Find...

2.	Absolutely. The program has pushed me, provided me with access to an excellent mentor and university supervisor, and as an added benefit provided me with skills that improve the overall quality of my life. Thank you! P.S. While it was not my original reason for choosing USD, I ended up being very pleased with the Catholic resources in Dr. Martinez's class that pushed us to think about education and the human dignity of all people.
